Docker

Git

Rest APIs

Flask

SQL

MongoDB

Kotlin

Ktor

## PERSONAL PROJECTS

### inSight

[GitHub Repo](#)

- Developed a web platform for university course and professor feedback in collaboration with a colleague.
- Features include QR code scanning for quick access, a voting system for students to rate professors on various criteria, a PostgreSQL database, FastAPI backend, Next.js frontend, and dynamic statistics visualization for courses and professors.
- Visit the web application at [insightbv.ro](https://insightbv.ro)

### Medly

[GitHub Repo](#)

- Developed an Android application for scheduling appointments with general practitioners in collaboration with three colleagues, using Android Studio, Ktor, and Kotlin.
- Integrated an LLM-based feature to analyze patient symptoms and provide doctors with potential diagnoses or relevant information to support consultations.

## LANGUAGES
